## Introduction

### What does it do?

You can define special search words and the pertinent page, for which redirect directly to the respective page. For these words, Indexed Search supplies no results. If you are a publisher, you can create "Softlinks" with special codes for external or internal links.

Livedemo at <http://www.netformic.de>:

- Type "redirect" or "typo3org" into the searchfield and see, what will happen :-)

## Tutorial

### Installation

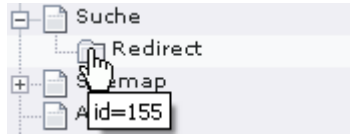

- This extension depends on "Indexed Search Engine" (`indexed_search`). Please install and configure this extension first

- After that, import "NETFORMIC Indexed Search Redirect" (`nfc_indexedsearch_redirect`) from online repository and install it

Frontend Plugins		
	Indexed Search Engine	<i>indexed_search</i>
	KB TV Content Slide	<i>kb_tv_cont_slide</i>
	News	<i>tt_news</i>
	[NETFORMIC] Indexed Search Redirect	<i>nfc_indexedsearch_redirect</i>

- Create a SystemFolder and name it *Redirect* (NOTE: the pid of my SystemFolder is 155)

- Insert into the Setup of your Maintemplate the follow line. IMPORTANT: change the pid into the pid of your SystemFolder

plugin.tx\_indexedsearch.redirectpid = 155

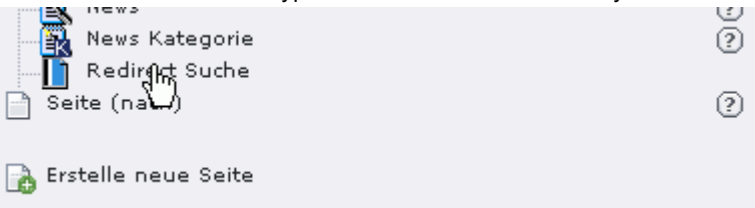

```

2 Setup:
#####
# [NETFORMIC] Indexed Search Redirect
plugin.tx_indexedsearch.redirectpid = 155

#####
# Indexed Search Config
plugin.tx_indexedsearch._DEFAULT_PI_VARS.type = 1
plugin.tx_indexedsearch.CSS_DEFAULT_STYLE >

```

- Add some new entries of type *Redirect Search* into this SystemFolder

**Redirect Suche NEU** - [PID: 155] Redirect

**Verstecken:**

**Suchwort**

**Zielseite**

e.g. these:

- That's it. Clear the cache and test your redirect search words

- NOTE:

- the extension always takes small letters, no matter whether the word is capitalized. (Abc -> abc)

- the extension always takes the whole search word string. (“redirect extension” is not “redirect” and “extension”)

## Configuration

Change “155” into the page id (pid) of the SystemFolder, where your *Redirect Search* are stored in

```
plugin.tx_indexedsearch.redirectpid = 155
```

## Known problems

- The extension is making use of XCLASS. So it might conflict with other extensions.

There are no known problems at the moment.

If you find any bugs, please write an E-Mail to [typo3@netformic.de](mailto:typo3@netformic.de)

## To-Do list

Let us know, if you need some special features or if you find bugs

## Changelog

0.1.0

- Initial release
